

Structural biology: main problems and approaches to their solution

June 5-7, 2024

IBCh RAS, Moscow

ORGANIZING COMMITTEE

Academician Mikhail Kirpichnikov (chairman)

Academician Alexander Gabibov (chairman)

Prof. Ekaterina Lyukmanova (co-chair)

Dr. Sergey Goncharuk (co-chair)

Prof. Zakhar Shenkarev

Dr. Marine Bozdaganyan

Dr. Philipp Orekhov

Dr. Erik Kot

Dr. Dmitriy Nolde

Dr. Marina Goncharuk

Dr. Anton Chugunov

Nikita Shenkarev

Vladislav Lushpa

Yaroslav Bershatsky

Milita Kocharovskaya

Feodor Kornilov

Pavel Mironov

Olga Shlepova

CONTENTS

ORGANIZING COMMITTEE.....	1
PARTNERS AND SPONSORS.....	1
CONTENTS.....	2
KEY INFORMATION.....	3
WELCOME WORDS.....	6
PROGRAMME.....	8
WORKSHOPS.....	14
ORAL PRESENTATIONS.....	19
Amunts A. – What can we learn from structural studies of mitochondrial complexes.....	19
Bagrov D.V. – Application of atomic-force microscopy in structural biology.....	20
Boyko K.M. – High-resolution structure of the light-harvesting complexes from the purple sulfur bacterium <i>Ectothiorhodospira haloalkaliphila</i>	21
Chugunov A.O. – Applications of the Emerging Deep Learning Techniques for Protein 3D Structure Prediction and Generative Design.....	22
Dubinnyi M.A. – NMR analytics from scratch to new bioluminescent systems.....	23
Efimov A.E. – Probe and optical nanotomography for structural analysis of biological objects and materials.....	24
Efremov R.G. – Computational structural biology of membrane proteins.....	25
Isaev N.P. – EPR capabilities in structural biology.....	26
Konevega A.L. – Rare events: Don't be lost in translation.....	27
Kostyuchenko V.A. – Cryo-Electron Microscopy Studies of Flaviviruses.....	28
Luginina A.P. – Structural GPCR investigations for rational drug design.....	29
Lyukmanova E.N. – Structural insight of regulation of SARS-CoV-2 interaction with ACE-2 receptor by specific antibodies.....	30
Mineev K.S. – NMR spectroscopy as a tool to study the single-pass cell receptors.....	31
Orekhov P. – Coarse-grained simulations of biomolecular systems.....	32
Polshakov V.I. – NMR studies of cooperative interactions.....	33
Schwalbe H. – NMR of RNA.....	34
Shaytan A.K. – Structural biology of chromatin.....	35
Shenkarev Z.O. – Gating-modifying spider toxins regulate TRPA1 channel by interaction with S1-S4 domain.....	36
Shi X. – Investigation of multi-scale dynamical properties in chromatin regulation by solid-state NMR.....	37
Sluchanko N.N. – Structures and applications of carotenoid-binding proteins.....	38
Sobolevsky A.I. – Structural view of TRP channel function and pharmacology.....	39
Sokolova O. – Unique structure of bacteriophage DT57C: what could cryo-EM show?.....	40
Usachev K.S. – Crystal structure of the eukaryotic ribosome in complex with small molecule inhibitors.....	41
POSTER PRESENTATIONS.....	42
AUTHOR INDEX.....	88
