DIFFERENTIAL AND DIFFERENCE EQUATIONS

Russian-Chinese Conference
Novosibirsk, Russia
October 31 – November 6, 2025

ABSTRACTS

Editor-in-Chief: G. V. Demidenko

NOVOSIBIRSK
2025

UDC 517.9

Differential and Difference Equations. Russian-Chinese Conference (Novosibirsk, Russia, October 31 – November 6, 2025): Abstracts / G. V. Demidenko (editor-in-chief). — Novosibirsk: Novosibirsk State University, 2025. — 160 p.

ISBN 978-5-4437-1832-3

Organizers

Novosibirsk State University

Sobolev Institute of Mathematics SB RAS

Editor-in-Chief: G. V. Demidenko

The conference is supported by the Mathematical Center in Akademgorodok under agreement No. 075-15-2025-349 with the Ministry of Science and Higher Education of the Russian Federation.

ISBN 978-5-4437-1832-3

Mathematics, 2025

Program Committee

Co-Chairmen:

Demidenko G. V. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Hu G.-D. (Shanghai University, Shanghai Customs University, Shanghai, China)

Secretary:

Skvortsova M. A. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Members:

Cong Y. (Shanghai University, Shanghai Customs University, Shanghai, China)

Gong Y. (Shanghai Customs University, Shanghai, China)

Kozhanov A. I. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Li S. (Dalian Maritime University, Dalian, China)

Neshchadim M. V. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Vaskevich V. L. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Volkov Yu. S. (Sobolev Institute of Mathematics, Novosibirsk State University, Novosibirsk, Russia)

Zhu P. (Shanghai University, Shanghai, China)

Organizing Committee

Chairman:

Matveeva I. I. (Sobolev Institute of Mathematics, Novosibirsk State University)

Secretary:

Denisiuk V. A. (Novosibirsk State University)

Members:

Dong W. (Shanghai Customs University)

Iskakov T. K. (Sobolev Institute of Mathematics, Novosibirsk State University)

Ivleva K. D. (Novosibirsk State University)

Ma X. (Novosibirsk State University)

Prokhorov V. S. (Novosibirsk State University)

Rudometova A. S. (Sobolev Institute of Mathematics, Novosibirsk State University)

Skvortsova M. A. (Sobolev Institute of Mathematics, Novosibirsk State University)

CONTENTS

Abdallah N., Biberdorf E. A.	
Accelerated algorithm for constructing spectral portraits.....	13
Abdisheripov K. K., Biberdorf E. A.	
Numerical solution of the extrapolation problem using the Godunov regularisation method	14
Aksenenko I. A.	
On different types of stability of a single difference equation with two complex coefficients	15
Anikonov D. S.	
Review of new formulas for the inversion of the Radon transform	16
Apanovich M. S., Shadrin K. V.	
Computer algebra methods and algorithms for solving the Cauchy problem for difference equations.....	17
Artushin A. N.	
Function spaces of $L_{p(\cdot)}(L_{q(\cdot)})$ -type with variable exponents.....	18
Astashova I. V.	
On new results in qualitative theory of parabolic control problems.....	19
Attaev A. Kh.	
On some initial-boundary value problems for a loaded hyperbolic equation with involution	20
Avanyan A. B., Margaryan V. N.	
Behavior of a class of polynomials at infinity.....	21
Balandin A. S.	
On exponential estimates of the Cauchy function and the fundamental solution for a linear differential equation of neutral type.....	22
Baltaeva I. I., Azimov D. B., Pulatova Z.	
Integration of the negative order Korteweg–de Vries equation with a self-consistent source in the class of step-like functions.....	23
Barotov B. Kh., Kozhanov A. I.	
Regular solutions in Sobolev spaces for degenerate Volterra-type integro-differential equations.....	24
Begimqulov F. Kh.	
On a boundary value problem for a nonlocal elliptic degenerate equation.....	25
Beloborodova A. V., Iskakov T. K.	
Stability of solutions to a class of functional-difference equations.....	26
Belykh V. N.	
On the evolution of an axisymmetric “drop” of an ideal incompressible fluid with a free surface	27
Biberdorf E. A.	
Determining the location of a matrix spectrum – new possibilities.....	28
Bogdanov V. V.	
Construction of velocity fields in seismic problems	29
Bravyi E. I.	
On the best conditions for solvability of a nonlocal boundary value problem for families of functional-differential equations	30
Bzheumikhova O. I.	
Boundary value problem for a third-order equation with multiple characteristics and involution	31
Chechkina A. G.	
On the Green function of the Zaremba problem for the heat conductivity operator	32

Chen X. X., Sun Y., Zhao W. X. Localized stem structures in the collisions between breathers for the (2+1)-dimensional Sawada–Kotera equation	33
Chirkunov M. Yu., Chirkunov Yu. A. New nonlinear models of dynamic longitudinal deformation of a viscoelastic rod.....	34
Chirkunov Yu. A. Group analysis of the differential equations of continuum mechanics and mathematical physics	35
Chudinov K. M. A way to generalize 3/2 stability theorems for delay equations	36
Danilov A. A., Gubarev Yu. G. Study of linear instability for steady-state three-dimensional flows of an ideal compressible fluid.....	37
Demidenko G. V. Pseudohyperbolic equations	38
Demidenko G. V., Ganzhaeva M. Sh. Properties of solutions of difference equations with periodic coefficients	39
Demidenko G. V., Ma X. Energy estimates for solutions to the generalized Boussinesq equation.....	40
Demidenko G. V., Shemetova V. V. On the unique solvability of a class of boundary value problems for a pseudohyperbolic equation.....	41
Denisiuk V. A. Properties of solutions to a system of nonlinear ordinary differential equations	42
Derevtsov E. Yu., Maltseva S. V. On a slice-by-slice solution of a refractive tomography problem in the half-space	43
Dong W. Q. Stabilization and observer design for generalized quasi-one-sided Lipschitz nonlinear neutral systems with multiple delays.....	44
Du H., Chen Z. A new Banach space and stable numerical method of solving 2D Riesz fractional differential equations with weak singularity on boundaries.....	45
Dzhamalov S. Z., Shokirov A. A. On a coefficient inverse problem with nonlocal conditions for the three-dimensional Chaplygin equation in an unbounded domain.....	46
Egorov I. E., Safonov S. V. Boundary value problems with integral boundary conditions for a second-order mixed-type equation.....	47
Eshmatov B. E. Problem for the beam vibration equation.....	48
Evseev F. A., Pyatkov S. G. On one initial-boundary value problem for quasihydrodynamic system of equations in weighted Sobolev spaces	49
Evtina D. S., Zhabko A. P. Development of the St. Petersburg mathematical school on the stability of controlled and uncontrolled dynamic systems	50
Fadillah M. R., Kirane M. On the non-existence of a global solution for a strongly non-linear equation with fractional Laplacian, fractional damping, and logarithmic nonlinearity.....	51

Fedorov V. E. Generation of resolving families for equations with the Dzhrbashyan–Nersesyan derivative	52
Feng Z., Wang X., Liu Y. Stochastic flocking dynamics of the Cucker–Smale model driven by Lévy noise	53
Finogenko I. A. On discontinuous functional differential equations with delay	54
Gadzova L. Kh. Green’s function of the Naimark problem for an ordinary differential equation of fractional order	55
Galiakberov R. R., Orlov S. S., Sidorov D. N. Periodic solutions of abstract differential equations	56
Ghazaryan H. G. Almost hypoellipticity in terms of smoothness of solutions of the corresponding differential equations	57
Golubyatnikov V. P., Ayupova N. B., Bondarenko N. E. Geometry of oscillations in phase portraits of dynamic systems	59
Gomes Tavares E. H., Barbosa da Silva M., Yuan J. Qualitative analysis of a MGT equation with memory	60
Gubarev Yu. G., Zhang B. Study of stability for stationary solutions to the Vlasov–Poisson equations of electron plasma in one-dimensional formulation	61
Hu G. -D., Hu R. Stability criteria of linear systems with distributed delays via fundamental matrix	62
Ilinykh I. D. On properties of a sequence of Lyapunov functions defined by one class of high-dimensional systems of differential equations	63
Ingtem J. G. 2D spline with minimal derivative	64
Iskakov T. K. Stability of solution to nonlinear differential equation with infinite distributed delay	65
Ivanova N. D. Nonlinear inverse problems for a class of equations with Riemann–Liouville derivatives	66
Jiang H. Control of dynamic systems with guaranteed location of controlled signal in a given set	67
Kanguzhin B. E. On the basis of the system of root vectors of differential-boundary operators with algebraic members	68
Karavaikin V. A. On the asymptotic stability of solutions to a class of nonlinear difference equations with a variable delay	69
Khachatryan M. A. Trace theorems in multianisotropic Sobolev space and their application in partial differential equations	70
Khudnev A. M. Junction problems for thin and volume inclusions in elastic bodies	71
Khoshimov D. Z. Investigation of the equilibrium of an elastic body with a thin curved inclusion	72
Khushtova F. G. Boundary value problems with a condition of the third kind for the fractional diffusion equation	73

Kononenko L. I., Volokitin E. P. Qualitative analysis of a singularly perturbed system of differential equations with fast and slow variables	74
Konovalova D. S. Two approaches to modeling the vibrations of a string system	75
Koshanov B. D., Oralbekova N. O. On a problem for a fourth-order elliptic equation in domains with a non-compact piecewise smooth boundary	76
Kosheleva Yu. A. Nonlocal problems for ultraparabolic equations	77
Kozhanov A. I. Differential equations with indefinite characteristic form	78
Kozhanov A. I., Mamanazarov D. S. Solvability of nonlocal problem with generalized Samarskii–Ionkin condition for degenerate quasiparabolic equations	79
Kozhanov A. I., Shadrina N. N. On the correctness of non-local problems for elliptic differential equations with discontinuous coefficients	80
Kozhanov A. I., Wang M. Nonlocal problems for the generalized Boussinesq–Love equation	81
Lashina E. A. Dynamics of a kinetic model of catalytic methane oxidation	82
Leinartene A. B., Lyapin A. P. Boundary value problem for a two-dimensional linear difference equation on the integer lattice	83
Li S. G. High-precision difference schemes for nonlinear dispersive wave models	84
Li X., Zhao C., Duan X. Higher-order quantum reservoir computing for forecasting complex dynamics	85
Liang J., Qi M., Tan W., Duan X. Detecting critical entities in flocking systems based on time series data	86
Litvinov V. L., Litvinova K. V. On one asymptotic method for solving a functional-difference equation describing oscillations of mechanical systems with moving boundaries	87
Lomov A. A. Parametric identifiability in serially connected linear dynamic systems	88
Lu X., Danilov O. A. Mittag–Leffler restoration formula for discrete analytic functions	89
Makarov V. A., Prokudin D. A. Existence and uniqueness in one-dimensional barotropic equations of compressible viscous multicomponent media	90
Maltseva S. V. Application of the Gerchberg–Papoulis method to tomography problems with incomplete data	91
Malygina V. V. On asymptotic properties of the Cauchy matrix for systems of neutral-type equations ...	92
Mamatov Zh. A. Nonlocal boundary value problems of spatial type for quasiultraparabolic equations	93
Mamatova N. T. Interaction of a loaded rod with the external environment according to the Winkler model	94

Mamontov A. E., Prokudin D. A. Solvability of the equations of viscous compressible multifluids	95
Matveeva I. I. On properties of solutions to time-delay systems	96
Matveeva I. I., Narekeeva A. B. Asymptotic properties of solutions to classes of differential equations with several delays	97
Melekhina D. V., Fedorov V. E. Inverse problem for the anomalous diffusion equation	98
Mingnarov S. B. Sufficient conditions for the solvability of the Cauchy problem for one pseudohyperbolic system	99
Mukumov A. Estimation of the stability of the Cauchy problem for the Hopf system	100
Namsaraeva G. V. Some inverse problems for the Boussinesq equation	101
Nazarov A. I. Stability and instability of time scale dynamical systems	102
Neshchadim M. V. Generalized Beltrami fields. Exact solutions	103
Nikitina T. N. The complex Monge–Ampere equation on positive currents of higher bidegree	104
Nikolaeva N. A. The junction problem of weakly curved inclusions in an elastic body with a crack	105
Nurjanov O. D. On a method for studying a multipoint boundary value problem for integro-differential equations	106
Nurmakhmatov V. S. The conditions for the existence of a strong solution to the boundary value problem for a pseudohyperbolic equation in a cylinder	107
Penenko A. V., Rusin E. V., Emelyanov M. K. Hybrid algorithm based on sensitivity operators and deep learning for identification of localized emission sources in advection-diffusion-reaction models	108
Polyakova A. P., Svetov I. E. Momentum ray transforms of two-dimensional tensor fields	109
Popov N. S., Popov S. V. On nonlocal integro-differential boundary value problems of pseudohyperbolic equations	110
Popov S. V., Popova M. N. Boundary value problems for forward-backward equations of odd order	111
Postanogova I. Yu. On invertibility of the operator at the derivative in a system of neutral type differential equations with two delays	112
Postnov S. S. Controllability and optimal control for some variable-order fractional system	113
Prokhorov V. S. Algorithm for the solution of the problem on the matrix spectrum location in a domain bounded by a parabola	114
Pskhu A. V. On the theory of differential operators of distributed order	115
Pyatkov S. G. On some classes of coefficient inverse problems	116

Radkevich E. V., Vasil'eva O. A., Filippov G. A.	
On the instability of equilibrium positions for the two-dimensional Broadwell kinetic model. Exponential stabilization of regular periodic perturbations.....	117
Rakhmatov N. B., Zikirov O. S.	
A mixed problem with an integral condition for a loaded third-order equation.....	120
Rogalev A. N.	
Topological and metric properties of solution sets of systems of ordinary differential equations with effects specified as functional parameters	121
Rossovskii L. E.	
On the influence of boundary perturbation on the solution to the boundary value problem for the Poisson equation.....	122
Rudometova A. S., Jumabaev A. D.	
Study of the panel flutter problem using the dichotomy method for the matrix spectrum	123
Sabatulina T. L.	
On exponential stability of a nonlinear differential equation with delay.....	124
Sagdullayeva M. M.	
A non-local problem with an integral condition for the third-order differential equation..	125
Saito Tavares T.	
Stability of Timoshenko–Boltzmann–Fourier systems.....	126
Semenov A. S., Bebikhov Yu. V., Semenova M. N., Dmitriev S. V.	
Numerical and molecular dynamic modeling of excitation of moving discrete breather under external influence.....	127
Sergeev I. N.	
Measures of stability and oscillation properties of a differential system	128
Sgibnev M. S.	
Exact asymptotic behavior of the solution of a matrix difference equation.....	129
Shcheglova A. A.	
Existence of solutions to descriptor systems with discrete time.....	130
Sitnik S. M.	
Essentials of transmutation theory.....	131
Skoromnik O. V.	
Solution of multidimensional Abel type integral equations with the special functions in kernels over a pyramidal domain.....	132
Skorynin A. S., Fedorov V. E.	
On the existence of a strongly continuous resolving family for a differential equation with the Hilfer derivative.....	133
Skripka N. M.	
Evolution equations on \mathbb{R} with Liouville derivative and bisectorial operators	134
Skubachevskii A. L.	
Boundary value problems for ordinary differential-difference equations and applications .	135
Skvortsova M. A.	
About the Hopfield neural networks model described by neutral type differential equations	136
Skvortsova M. A., Mu Y.	
Estimates for solutions in one predator-prey model with two delays.....	137
Soldatov O. A.	
Inverse problems of recovering lower-order coefficients from boundary integral data.....	138
Svetov I. E., Polyakova A. P.	
Normal, longitudinal and weighted Radon transforms of 2-tensor fields in \mathbb{R}^3	139
